THE NEW
SBUG

Fantastic four

SOUTH BAY TRS-80 USERS GROUP

1. - **Cnctaste**
2. **EDITORS NOTE**
3. **WOULD YOU LIKE TO BE AN EDITOR?**
4. **ODD AND EVEN PARITY BITS**
5. **MAIL CORNER**

SBUG meetings are held the 3rd Tuesday of each month in the north-east corner of Dyess's building at:

Time - 7:15 to 10:30 PM 5401 Patrick Henry Drive
Secte Cleare, Ca

February 21, March 20, April 17

Topic of the month

Not known to me at the moment.

Also!!! Don't forget the SIG group that meets at Dyess the first Wednesday of each month (February 1st). The Model 100 is popular at this meeting. See you there!!!

MEMBERSHIP

If you would like to become a member of SBUG and start receiving our newsletter "Dynamic Memories" than send \$18.00 (check/money order) to the following address:

South Bay TRS-80 User Group
P.O. Box 60116
Seaside, Ca 94088

ur come to one of our meetings. If you also wish to communicate with our bulletin board system (SBUG-80) than include an additional \$25.00 for an account on the system. You must be a member of SBUG to have an account on SBUG-80. Please, include your address and phone number. Thanks . . .

If tha nnsd arises, feel frss tn give nns of us a call.

THE EDITOR'S TWO BITS

A point nf view from your new editor-in-chief.(I regret tn inform you that your former editor was editor in handkerchief last I saw him). I feel strongly that the purpnse nf this newsletter is tn serve all ths members. Input from you will help Chuck sod me achieve this end. Not everynns likes tn write. (And a good thing far thn national foraste, too). Look for me at the meetings, and let me know verbally what you find gusting and disgusting about your newsletter. If you don't like talking asks signs. Tha squaky wheel gets tha grass.

The orientation nf the club, and nf this newsletter has always been directed towards the technical. I believe this is as it shnuld be. We are hobbyists. If we want to gainip, we can go down tn the corner salnnn and destroy a few reputatinns. So let's get technical.

SOUTH BAY TBS-80 USERS GROUP

WOULD YOU LIKE TO BE AN EDITOR?

You think you've got trouhlea? I'm an editor. I've got troublea. Let me tell you, bertmadr--no, that was enothar time and place.

Owing to the urging of my best friende and a unsimious vote in my favor, I becomn the editor of "DYNAMIC MEMORIES". I didn't exapt a rose gerden, and I didn't gnt one.

My quelificatione? I had never edited anything longer then the lettara I send to the tenanta here telling them to clean up tha oil their car dripped onto the carport floor. Scribeit which is used as tha word proceaeor and editor was en unopnned book to me. Rob Byrd trind to teach mn, snd all he got out of that was a case of flu. Be cernful what you try to taach me!

The book ia now opened, but I'm not hrraging. This awaletter has been written/end/or edited by mn with Scribeit. I won't let anyone wetch ma working, though. I might have another sick person on my consience--sick from laughing at my fumhling. Never mind, give mn five yrsrs, and I'll be en nxpart.

But this is nothing. Let us go on to the great modem caper. Let us talk of aveyt browe, five toed handa, furrowed browe, tha deptha of ignorance, the agony of total daspair. Did you ever inatell an RS-232-C hoard? If you dava, then shut up, if you havan't than lietna closly to this tala of drama upon tha high computnr.

'Twae the 8th of Fnhruery whan I dncided to install the RS-232 boord in my model III. On that eunlit day no thought of whet I was facing entered my carefree head. No thought antared my heed, I said.

Calling upon my wife to give me morel support, manusl dextarity end braine, I bagen my teak. Cereful planning, and infinita attantion to detail warn the hellmarke of this highly acientific venturn. Eech scrav wasa propnry labellad. Tha ceea wea removed millimtar by milimeter so as not to break tha CRT nack. And so, procdeding with the moet exquaita caution, we finelly arrivad at tha Logic Board. Shadna of stout Balboa upon a hill et Darien!

Now to the minutn drawing in living color of nach pertinatt cable and wire. Oncn recorded we make the necesaery diaconnnectione and !!! installed the RS-232 hoard. Triumph. All ie well. We calmly raconnect tha cablna and wirne, replacn tha Logic Boerd, the aluminum shell, the computer casing--oncn agein millimtar by millimeter avoiding all contact with the CRT nack.

Plug in the computer and turn it on! The disk drive lights go on, the drives whirr and TERROR TIME!!!! The head whirls, the stomach rumbles, the bowels gripes. The screen shows no reaction, the CRT will not light, no disk will boot up. Even in this murky miasma we go evenly forward. We disassemble again. We disconnect the RS-232 connections.

Now the CRT lights up. Calling to our aid our native genius, and our two hours of experience, we brilliantly reverse the wire power cable plug of the 232 board, and voilà! all is well. Model III lives.

And the modem? Does the modem work? Ask me that tomorrow, I'm too tired for that now.

ODD AND EVEN PARITY BITS

Try this little program on your model ?
 10 A=MEM
 20 DIM AZ(19,19,19)
 30 PRINT "ARRAY USED";A-MEM;"BYTES"

48K isn't much memory is it? Thanks to William Sarden Jr., "Programming Techniques".

"INFOWORLD" has tightened up its ratings system. It's quite obvious the beat has been put on the reviewers. If you want a general interest computer magazine, it's hard to pass "INFOWORLD" by. I believe that with the new rating policy it would be worth one's time to follow these rating's recommendations. Too bad they're so heavily weighted with IBM.

Continuing with magazines, I like "BASIC COMPUTING" subtitled "The TRS-80 User Journal". Take a look at it

When I went to buy my 232 board I ran into a young saleswoman at the Radio Shack computer store on 8th and Main who is the height of obnoxiousness. (If you like that word you can keep it). I was not allowed to purchase the board without installation, and when I asked to see something in writing to the effect that the RS policy I was told that he'd write it out if I wished. There was more in the same vein. So I bought it at ComputerViations, and got the RS model either. When will Radio Shack learn that they're not the only game in town? When will RS get a saleswoman who knows what they're talking about? When will the sun shine at night?

Enough bile, let us go to kudos. The Radio Shack store in my neighborhood (Capitol Avenue in San Jose) are uniformly courteous and helpful.

More kudos. The ProSoft "Tallymaster" program is excellent for many types of bookkeeping. Try it.

RE: Finally!!!!

Hi Gaog!

The December programs from 80 Micro are online (DIR 1 /L80). Get what you want now, because they will be online for only one week. The January programs will be available next week.

Rob...

<Message from JIBBYTRM at SBUG-80 01/21/84 07:53:36>

Ok, I've had it !!! Those ,# CRC errors are getting me down. Superzap, Superutility, Trekceas can't make changes to the disk sectors if there are CRC errors. Is there a program that will allow you to ** SEE ** the CRC bytes and will let you correct them!! I'm sure that there are lots of members that would like to know this.

thenke

<Message from GLENN at SBUG-B0 01/21/B4 21:07:06>
RE: GRG BYTES

It would do no good to be able to read the GRG bytes as
they are not what is bad - rather they signify that there is
an error in the data somewhere in the sector - not in the
GRG bytes. The GRG is a sum-check (actually a little more
complex than a check-sum) of all the bytes preceding them.
An error say wbars will give a BAD GRG message.

Glenn

RE: MOD 100 DECISION PROGRAM JUST DOWNLOADED

ATTENTION !!!!

THE PROGRAM (DECISION/ASC) IS NOT 2 GRAMS AS STATED ON THE INDEX. IT IS 5 GRAMS. SORRY !!!
THIS IS OF COURSE AN ASCII FILE FOR THE MOD100 AND YOU WILL NEED TO LOAD IT INTO BASIC TO RUN IT.

HAVE FUN
<JIBBYTRM>

I NEEDED IT TO DECIDE WHETHER I'LL RELOCATE TO PHOENIX, OREGON OR ??? . I HAVE BEEN ASKED TO MOVE TO PHOENIX BY THE COMPANY. JUST LOVE IT, MOVING OUT OF AN AREA I'VE GROWN UP IN ALL MY LIFE. I'M SURE THE PROGRAM WILL BE VERY POPULAR AT WORK !!!

<Message from RON at SBUC-BO 01/23/84 15:37:01>
RE: CRC ERRORS

Use superutility "format without erase" to fix a bad sector (MAYBE!!). What it should do is read the sector as best it can (usually part of 256 bytes get garbled i.e. bit shifted N bits) and reformat the whole track (a single sector cannot be reformatted; the crc error sort of comes from the formatting of a sector being corrupted). To test my theory, get a diskette with a crc error which u can afford to loose (or maybe touch the edge of a magnet to one point on diskette) & try it, in case I was wrong about SU!
(say S(kip) to SU when it can't read a sector)

<Meassage from RON at SBUC-BO 01/24/B4 12:30:15>

RE: CP/M

I am working on the hardware to put an 8" drive on the Model 4. Hope to have it up and running before long. However....there is no CP/M which supports 8" drives on the Model 4. I don't know that much about CP/M and even less about how the drives are accessed. I have been able to locate the sector translation tables for each drive, the Disk Parameter Header, etc. however. Question...anyone know enough about this to point me in the right direction (or towards the right expert???) (408) 867-9533 or write on board.

<Message from PHANTOM at S8UG-80 01/11/84 18:26:58>
RE: LNW II RUMORS AND VALUE
Read command :

Hi all,

I logged on to a BBS back in New York and saw that the LNW Research MAY be planning to build and sell an co processor for the LNW ... a 8088. Meaning that if the rumor is true it would make the LNW the only computer on the market that will run Model I III and CPM and IBM software. It would mean also that it would run more software than ANY other micro on the market.

I noticed a note that someone was asking what computer was a good deal and I have to say that the LNW has to be counted as a real GOOD DEAL because it has all the features of a MODEL I and more like HI-RES graphics color sound everything....well almost....

An excellent machine....I know I have one.

RE: Orange County Users Group (bbs closed down)

Hi Gaeg,

I was just lookieg through the OCTUG eewaletter
and noticed ee ioteresting eveet. It seems that
the group closed down tbeir BBS because quote,
"The BBS ie out of the board's costrol and is a
fieacial burdee." Augh!! Is this a treed??? No
does't worry, this cao't happen to SBUG-BO.

SBUG-BO ie actuallly an idepeend entiy from SBUG.
We are managed, finaiced, and operated idepeendent
of the SBUG steerieg committee. SBUG-BO and SBUG
share a unique relatioeeip with an agreed trade
of phese expesces for eewaletter material needed
for SBUG's "Dyemic Mamariae." Included in the
agreement was the msidetary mambership in SBUG
to commueicata with SBUG-BO. To maks ause that
SBUG-BO ia properly represeeted within SBUG, a
new steerieg committee positioe (SYSOP) was
created. Tha SBUG-BO staff will detarmine the
represeetative to the SYSOP steerieg committee
seat. Soued complicated? Maybe...like any other
bureaucratic mesa, but it work!!! Would eeyene
cseeider SBUG-BO a burdee???

Reb...

RE: The new version of PWORD...

Hi again!

I talked to Eric...it's done!! A few mere minor
repairs," said Eric. He is goieg to bring it to me
Saturday at the steerieg committce maeeting. But,
that doeasn't mear that we are geing with the new
system Saturday. Most the chaegas ie PWORD will be
improved aystem operator fuctioes. Other changes will
include: removal of the "*" procseding some SBUG-BO

FEBRUARY 1984

commodo (i.e. "MAIL will become MAIL), full support of our DC Hayes' 1200/300 baud recognition, and a much improved help facility with 40/64 column listing for the Model 100. As you can see, we will need to break a few habits. First, I must break a few habits of my own, before the new system will be on SBUG-80. Much system organization will be needed to integrate the new PWORD with the old...shouldn't be too long now.

RE: NEWSLETTER...

Ok Gaog, just because I'm no longer editor doesn't mean that everyone stops contributing newsletter articles...Joel sends articles for next month's newsletter!! I plan to have one article for Joel by next Saturday; can someone follow with another article?? How about a few tutorial articles on assembly?? I'll hat there are members who would enjoy an article on beginners BASIC...If we all give just a little, could you imagine what we would have??? Think about it... In the mean time I will be writing some stuff with my Model 100. Oh yes, if you are worried about your writing skills, let me know. I can process your article through Electric Webster and Grammatik. Give it a try, and let me know some new names in the next issue of Dynamic Memories.

RE: cp/m on model 4

For the information of all, I seem to have an 8" drive working on the Model 4 using the Holmes controller. It works to Model 3 NEWDOS 80 V2 single-density and as best I can now tell, I have successfully patched Hootazone Micro CP/M 2.2 for standard CP/M 8" IBM format. (You can't run double density, since the model 4 clock is not fast enough due to some time stretching or wait states that Tandy has introduced.) If anyone needs help on putting the patches into the CP/M, I can help you. I think I may try to write a configuration utility for 8" support, as it has to be done manually now.

<Editor's note: If discontinuing your computer expenses from your income tax to the game, keep a record of the hours spent specifically on business as distinguished from personal and pleasure hours apart of the keyboard etc.
